

Potomac River Group, LLC, provides training, services, and equipment supporting the military, law enforcement and border security communities, both domestically and internationally. Over the past 14 years, PRG has developed into an expansive and flourishing business focused on various aspects of US National Security. As part of our core services business, PRG has delivered training programs and security equipment to over 90 nations on behalf of the Departments of State and Defense.

PRG has been awarded a combined Task Order amount of over \$2.2M under its Export Control and Related Border Security (EXBS) Program Equipment and Training IDIQ contract with the Department of State, Office of Export Control Cooperation (ISN/ECC). The EXBS Program is currently active in more than 60 countries as a comprehensive, responsive and flexible resource for addressing critical aspects of nonproliferation objectives for partner nations.

The EXBS program works with partner governments to stem the proliferation of weapons of mass destruction and their delivery systems, as well as illegal transfers of conventional weapons, by assisting partner nations in establishing effective strategies for trade and border control systems. As part of this mission, the EXBS program provides partner nations with detection equipment, training, support and maintenance programs for customs and border control agencies.

These task orders will focus on mobile X-ray maintenance, X-Ray Analysis and Risk Analysis Training, as well as provide equipment, equipment installation and related training needs to foreign strategic trade and border control partner nations for effective WMD interdiction and border security.

Since 2009, PRG has won over \$20 million in task orders under this contract, delivering over 40 iterations of X-Ray Image Analysis Training Courses worldwide, over 215 preventative maintenance services on non-intrusive inspection equipment and over 18,840 pieces of equipment and numerous new equipment training classes.
